

# BOARD MEMBER

## **Brock Boyer**

For Drive Engineering, Brock serves as a Project Manager and Systems Engineer with a focus on infrastructure and information technology-based projects. Brock has project experience in Intelligent Transportation System (ITS) design and management, systems/network engineering and design, website and application development, technical document development, and hardware and software configuration. Additionally, Brock runs on technical construction projects involving communications design and engineering (fiber, copper, cellular, radio, etc.), hardware (ITS devices, switches, routers, firewalls, etc.) and software configuration and integration, low voltage electrical design, network design and engineering, and application/solution development.
